

MAHESH BANSAL

About the artist:-

Mahesh Bansal, a mechanical engineer by qualification, has been a part of the art scenario for quite a long time. He was born in 1972. His keen interest in art inspired him to start an art gallery. He founded Stupa18 Gallery in 2009 with a sole motto to promote new talent and make art reachable for art lovers. Art seems to call him since early age and therefore without any formal training he also paints when he feels like.

About his works:-

Abstraction is Mahesh's medium to express his emotions as well as his experiences. He is very much inspired by the dots which is a vital element. By composing the dots in an excellent way he gives a thoughtful meaning to a blank canvas. His paintings give the viewers an image to decipher and also develop a relationship between abstraction and form.

Due to his passion for art, he has constantly been in touch with the artists, buying and appreciating their works; also encouraging as well as promoting promising talent.
